

Project Demonstration Phase

Demonstration Plan

Field	Details
Project Name	[Your project name]
Presenter(s)	[Name(s)]
Version	1.0
Date	30 September 2026
Status	Draft

1. Introduction

The Demonstration Phase is where the finished project is shown to the client, guide or stakeholders. The goal is to prove that the product works, meets the requirements and solves the intended problem.

2. Objectives

- Show the working product and its key features.
- Prove that the requirements have been met.
- Collect feedback from the audience.
- Answer questions clearly and confidently.
- Get final acceptance for the project.

3. Demo Details

Item	Details
Date and time	[Date, Time]
Venue / platform	[Room / Zoom / Google Meet]
Duration	[e.g. 20 minutes demo + 10 minutes Q&A]
Audience	[Client / Guide / Stakeholders]
Presenter(s)	[Name(s)]

4. Demo Agenda

Time	Activity
0 - 3 min	Welcome, project title and problem statement
3 - 6 min	Objectives and solution overview
6 - 16 min	Live demo of main features
16 - 19 min	Technology used, results and achievements
19 - 25 min	Question and answer session
25 - 30 min	Feedback and closing

5. Features to Demonstrate

No.	Feature	What to show	Presenter
1	User login / signup	Create account, log in, log out	[Name]
2	Core feature	Complete main workflow end to end	[Name]
3	Dashboard / reports	Data views, charts, filters	[Name]
4	Extra features	Notifications, admin panel, etc.	[Name]

6. Demo Script (Sample Flow)

- **Start:** "Good morning. Our project is [Project Name], built to solve [problem]."
- **Show:** Open the app and walk through the user journey step by step.
- **Explain:** Say what you are doing and why, while you click.
- **Highlight:** Point out the features that make the project special.
- **End:** Summarise results and thank the audience.

7. Preparation Checklist

- Test the full demo at least twice before the actual day.
- Prepare sample data and test accounts in advance.
- Check internet, projector, microphone and laptop charger.
- Keep a backup: recorded demo video and screenshots.
- Keep slides, source code and documents ready to open.
- Assign one person to run the demo and one to handle questions.

8. Presentation Slides Outline

Slide	Content
1	Title, team members, guide / client name
2	Problem statement
3	Objectives
4	Solution and architecture overview
5	Technology stack
6	Live demo / screenshots
7	Results, testing and achievements
8	Challenges faced and how they were solved
9	Future improvements
10	Thank you and Q&A

9. Possible Questions and Answers

Question	Prepare to explain
Why did you choose this project?	Real problem, benefit to users
Why this technology?	Reasons: speed, cost, team skills, support
What were the main challenges?	Problems faced and the solutions used
How is data kept secure?	Login, roles, encryption, validation
What can be improved in future?	Extra features, scaling, mobile app

10. Risks and Backup Plan

Risk	Backup
Internet failure	Run a local version or play the recorded demo
Software crash or bug	Restart quickly, show screenshots and video
Projector / laptop problem	Bring a spare laptop and files on a pen drive
Time running short	Skip minor features, focus on the main flow

11. Feedback Collection

- Note all comments and suggestions during the Q&A.
- Ask the audience to rate the product on a simple form.
- List the changes requested and plan follow-up actions.

12. Deliverables

- Working, tested product
- Presentation slides
- Demo video (backup)
- Project report and documentation
- Feedback summary

13. Acceptance and Approval

Role	Name	Signature	Date
Project Manager			
Client / Guide			
Team Lead
